

CALL FOR BOOK CHAPTERS

Springer Proceeding Book:

“Contemporary Economic Issues in Asian countries: Proceeding of CEIAC 2022”

*Nguyen An Thinh, Pham Thu Thuy (editors-in-chief),
Joon Song, Yen-Ling Lin, Dong Manh Cuong*

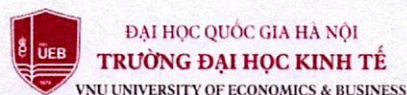

Asia is the world’s largest regional economy and is increasingly the center of the world economy. As its economies will be integrated further, Asian economy has the potential to fuel and shape the next phase of globalization. In recent years, the world economy and the Asian economy in particular have experienced a lot of upheaval due to Covid-19 pandemic, military conflicts, trade wars and the shifting of global supply chains. Therefore, significant aspects of economics and development in the context of global changes in Asia is remarkable.

University of Economics and Business (UEB), Vietnam National University, Hanoi organizes the international conference on “*Contemporary economic issues in Asian countries*” (CEIAC International Conference 2022) on December 2022 collaborated with Springer Nature Switzerland AG, Sungkyunkwan University (Korea), and Tamkang University (Taiwan). The theme of the CEIAC Conference 2022 deals with wide aspects of the contemporary economic issues in Asian countries. It covers broader topics such as economics and business, green economy and sustainable development, and international trade and investment.

As an outcome of the CEIAC International Conference 2022, a Springer Proceeding Book “*Contemporary Economic Issues in Asian countries: Proceeding of CEIAC 2022*” is divided into three parts:

- **Part 1. Economics and business:** economic theory, national and international income distribution, macroeconomic policies, sectors of economy, productivity developments, financial market, business governance, bank financing, etc.
- **Part 2. Green economy and Sustainable development:** developing process, development policy, public policy, sustainable growth, green growth, etc.
- **Part 3. International trade and investment:** international trade theory, free trade agreements, tariffs, intellectual property, international law, etc.

The Springer proceeding book as a whole and each of the fulltext chapters will be peer reviewed.

The book addresses a wide array of professors, researchers, lecturers, and students in fields of economics, and consultants, and decision makers interested in the issues related to economic issues in Asia.

The book editors

The Springer Proceeding Book “*Contemporary Economic Issues in Asian countries: Proceeding of CEIAC 2022*” is edited by five editors. The editor-in-chiefs are Assoc. Prof. Dr. Nguyen An Thinh and Dr. Pham Thu Thuy. Other editors are Prof. Dr. Joon Song, Prof. Dr. Yen-Ling Lin, and Dr. Dong Manh Cuong.

Assoc. Prof. Dr. Nguyen An Thinh who guided and performed an impressive series of economics, sustainable development and climate change projects in Vietnam. Currently professor Nguyen An Thinh is in charge of Dean of Faculty of Development Economics, VNU University of Economics and Business, Hanoi. Professor Nguyen An Thinh is the editor-in-chief of the books “Human ecology of climate change hazards in Vietnam”, “Global Changes and Sustainable Development in Asian Emerging Market Economies: Proceedings of EDESUS 2019” (Vol. 1 & Vol. 2) published by Springer in 2019 and 2021.

Dr Pham Thu Thuy is a senior scientist who leads the Climate Change, Energy and Low-Carbon Development team at CIFOR-ICRAF. Her research focuses on the political economy of forest governance and climate change policies, including low-emission development strategies, payment for environmental services, reducing emissions from deforestation and forest degradation, addressing the poverty-environment nexus, environmental and social justice, sustainable wetlands management, social forestry, wildlife conservation and social inclusion. She has also led and coordinated global climate change research and established a strong professional networks in Asian developing countries.

Prof. Dr. Joon Song is a professor in the Department of Economics, Sungkyunkwan University, Seoul, Korea. His previous position was a lecturer in the Department of Economics, Essex University, UK.

Prof. Dr. Yen-Ling Lin is Economics Ph.D. and Education Ph.D. She is the Chair of Department of Economics, Tamkang University, Taiwan. Her major research fields are labour market and higher education. Professor Yen-Ling Lin is guest editor of the SSCI Journal Sustainability in 2022 to 2023.

Dr. Dong Manh Cuong is an expert in financial econometrics. Currently *Dr. Dong Manh Cuong Thinh* is a lecturer in the Faculty of Development Economics, VNU University of Economics and Business, Hanoi.

Deadline, structure and format of the book chapters:

- Deadline:
 - Deadline for submission of the title and abstract of chapters: *August 1, 2022*
 - Deadline for submission of full-text chapters: *October 10, 2022*
 - Deadline for peer-review, edit, proof-read, and final publication: *2023*
- Structure and format: Please find the detailed requirements in the attached Format Guideline

Submission address and contacts:

We welcome you contribute book chapters. Chapter book manuscript is submitted to:

Email: economicbook2022@gmail.com

If there is any inquiry regarding the submission and other information, please contact:

- Dr. Dong Manh Cuong (VNU-UEB)
Mobile: (+84) 867686548; Email: dongmanhcuong@vnu.edu.vn
- Dr. Vu Thi Thuong (VNU-UEB)
Mobile: (+84) 9488658684; Email: thuong16482@gmail.com

The Book Editorial Board would like to thank the authors for your contribution to the book.

ON BEHALF OF THE ORGANIZING COMMITTEE
VNU UNIVERSITY OF ECONOMICS AND BUSINESS

VICE RECTOR 

ASSOC. PROF. DR. NGUYEN ANH THU

Abstract

Texts: 150 to 250 words (11 point, Times New Romance, normal style).

1. TITLE (11 point, bold, capitalization, number “1.”, “2.”).

- Use a normal font (11 point Times New Roman) for text.
- Use tab stops or other commands for indents, not the space bar.
- Save your file in docx format (Word 2017 or higher).

1.1. Title (11 point, bold)

1.1.1. Title (11 point, bold)

1.1.2. Equation

- Use the equation editor or MathType for equations (11 point, Times New Romance, normal style).

1.2. Figure

- The image is a high-contrast black-and-white image (dpi \geq 300).
- Figure captions begin with the term Fig. in bold type, followed by the figure number, also in bold type.

1.3. Table

- All tables are to be numbered using Arabic numerals.
- Use the table function, not spreadsheets, to make tables.
- Tables should always be cited in text in consecutive numerical order.
- For each table, please supply a table caption (title) explaining the components of the table.

Abstract

Texts: 150 to 250 words (11 point, Times New Romance, normal style).

The book chapter should have maximum 15 pages (including appendices)

Sample of a book chapter

Chapter 15 Research on Interpolation Methods and Fitting Models for the Lorenz Curve

Li Zhang, Kien Nguyen The, Q. Youjian, Lizhen Wei, Khac Lich Hoang,
and Manh Hung Le

Abstract The Lorenz curve is very important to show the income distribution for a country. Based on the work of other scholars, this chapter at first discusses some existing interpolation methods and points out their shortcomings. To overcome the existence of higher-order derivatives for Lagrange interpolation, this paper sets up one method and makes some analyses about the methods. Then, a new family of Lorenz curves is suggested and the corresponding properties discussed. With collected income data from some regions in China, statistical indices show better results compared with other existing curves.

Keywords Interpolation method · Lorenz curve

1 Introduction

From the last century since the reform and opening, with the continuous development of the economy, the overall strength of our country and its economic conditions have improved greatly. However, in some provinces rural poverty still exists in remote areas. The party and the government have placed great importance on the

4 Conclusions and Discussion

In this paper, we provide the background of the Lorenz curve and the Gini coefficient. The basic relationship between the Lorenz curve and Gini coefficient is described. Then, some transformation formulas for the density function and the distribution function are presented. Based on the graphical character of arch function, we propose a new method to construct a family of Lorenz curves and show some properties of it. With the collected income data in China, some computations about parameter estimation and error analysis are completed. The results show that our models are superior.
